PROFESSIONAL SUMMARY

BCA graduate with hands-on experience building **full-stack web applications** using **Java, Python, JavaScript, and PHP**. Skilled in developing **CRUD-based systems**, integrating **MySQL databases**, and implementing **authentication and REST APIs** across personal projects. Focused on writing clean, maintainable code and building practical, scalable software solutions.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, PHP

Web Technologies: HTML5, CSS3, REST APIs, Responsive Web Design

Database: MySQL, SQL

Tools & Platforms: Git, GitHub, VS Code

Core Concepts: Object-Oriented Programming, CRUD Operations, Authentication, API Integration, Debugging, SDLC

PROJECTS

College ERP Management System

May 2026 - Jun 2026

Personal Project | github.com/vikas-dev09/college-erp-system

- Developed a full-stack College ERP Management System using PHP and MySQL to automate student, faculty, and administrative workflows.
- Implemented secure user authentication to protect access to student and administrative data.
- Built CRUD-based modules for attendance tracking, examination records, and fee management using PHP and MySQL.
- Designed the frontend using HTML, CSS, and JavaScript to deliver a responsive interface for administrative reporting.

Tech Stack: HTML, CSS, JavaScript, PHP, MySQL

Foodies - Multilingual Food Platform

Nov 2025 - Dec 2025

Personal Project | github.com/vikas-dev09/food-recipe-website

- Built a multilingual food discovery platform using PHP, MySQL, HTML, CSS, and JavaScript, enabling users to browse content across multiple categories.
- Developed backend functionality for user favorites and reviews using PHP and MySQL.
- Implemented a personalized recommendation feature and social sharing functionality to improve user engagement.
- Designed a responsive frontend interface to support multilingual content across the platform.

Tech Stack: HTML, CSS, JavaScript, PHP, MySQL

SecureMind - Security Utility Platform

Feb 2026 - Mar 2026

Personal Project | github.com/vikas-dev09/securemind

- Developed a Python-based application featuring password strength analysis and URL security checks.
- Built core backend logic in Python with MySQL for data handling and utility functions.
- Applied fundamental web security concepts to design practical, user-facing tools.
- Structured the codebase in modular components to support additional tools and features.

Tech Stack: Flutter, Python, MySQL, Kali Linux, Web Security Basics

EDUCATION

Bachelor of Computer Applications (BCA)

2023 - 2026

Himalaya BCA College, Ankola

Higher Secondary (PUC)

2021 - 2023

Jai Hind English Medium School, Ankola

CERTIFICATIONS

Full Stack Web Development - GATES Institution

Dec 2025

Introduction to Cybersecurity - Simplilearn

Jan 2026

Cybersecurity Mastery-Upstop

Aug 2026
